

Individual solutions that minimise risk. Preventive maintenance contracts.

What is a preventive maintenance contract?

Linde's preventive maintenance contracts are maintenance solutions custom-designed for your company-owned pressurised gas distribution systems. Through routine inspections carried out by trained professionals, you can be assured that your pressurised gas systems are always in compliance with local regulations and fully optimised to operate at their peak performance. Any deviations from regulations or early warning signs such as leaks or breakdowns are documented and immediately reported to you along with repair options, giving you both the choice and control you need. Depending on your requirements, we can perform all necessary maintenance and repairs as they are encountered.

Is a preventive maintenance contract the right solution for me?

If your company owns a pressurised gas distribution system, a Linde expert can take care of all your maintenance, safety and compliance needs. Whether your system consists of a single regulator with minimal piping or a complex system with many control and outlet points, Linde's preventive maintenance contract has got you covered. With Linde's qualified experts managing your gas distribution systems' maintenance needs, you have the peace of mind that allows you to focus on your core business.

What are the benefits for me?

Increased safety

- Leverage Linde's extensive knowledge for hassle-free safety compliance
- Be reassured that your gas distribution system is safe for employees and the public

Reduced risk of gas system failure

- Have minor problems identified before they turn into major repairs and downtime
- Ensure that fast-wearing components are inspected and replaced accordingly

Documentation and control

- Receive hardcopy reports of all inspections and audits performed by trained technicians

Reduced costs

- Have costly gas leaks identified and repaired
- Have components replaced before they escalate into major costs
- Minimise risk of costly downtime and lost production

→ Individual solutions that minimise risk. Preventive maintenance contracts.

What type of equipment can be covered?

- Regulators and pressure monitoring equipment
 - Customer-owned fixed and portable compressed gas systems
 - Manifolds, distribution piping and hoses
 - Pressurised process plants, gas generators and piping
-

How does it work?

When you sign up for a Linde preventive maintenance contract, we will perform a detailed review of your current pressurised gas distribution system, operating specifications and relevant safety legislation. Each contract is highly customised to your situation, and can vary depending on the complexity of your gas supply system and the contractual options you wish to have included. After the initial review of your system, we will administer a programme of routine maintenance inspections, issuing a report after each visitation. The process is completely managed by Linde, allowing you to focus on your company's core activities.
