

LIGHTING PURE GASES

Description Linde is the primary gas manufacturer and supplier of rare gases as well as halogen and hydride gas mixtures to light bulb manufacturers worldwide.

Linde's expertise in the purification and analysis of each gas component within the lighting gas mixture assures the light bulb manufacturer of the highest quality gas being used for each and every light bulb.

The lighting formulas innovated by Linde guard against impurities that are harmful to light bulbs. These harmful impurities include:

- Carbon Monoxide
- Hydrogen
- Freons
- Moisture
- Hydrocarbons
- Oxygen

Below are the pure gases that Linde manufactures and supplies worldwide for the lighting industry. If you have an inquiry regarding any lighting pure gas component, please contact your local Linde facility.
